

#### Notes:

- 1) Pullups R2 and R3 may be unnecessary.
- 2) R4,5,6 is a protection resistor and could be wired across instead..
- 3) Fuse (F1 or F2 footprint) could be wired across. T1K already has a fuse. More fuses never hurt.
- 4) C7 and C7\_1 are optional and tie shields to GND

PS2 Keyboard to Convergent NGEN Computer Adapter
